What to consider when choosing a regulator

Major considerations in the selection of a regulator are listed here. Within the requirements of your specific application, use this catalog to find the regulator that matches your parameters. Our standard products are only a starting point. We can modify or create a control that will solve your toughest application problem. Detailed information is available through your local TESCO representative.

HANDKNOB

Large handknob provides easy, low torque pressure setting. Wrench or screwdriver adjust options on some models.

VENTING

Venting feature enables relieving of the outlet pressure when the handknob is turned in the “decrease” direction.

Captured venting configuration includes extra port to pipe away expelled fluids from a regulator’s vent valve.

Non-venting feature available for hydraulic or other applications where venting is not desirable.

FLOW CAPACITY – C_v

C_v is a measure of regulator flow capacity. The flow coefficient refers to the flow of one GPM of water at one psi drop across the main valve. The coefficient for gaseous service must be determined from the ratio of inlet to outlet pressure.

BODY MATERIALS

Brass, aluminum or stainless steel (Type 300, 316) and others.

OUTLET PRESSURE RANGES AVAILABLE

Starting at 50 mm Hg absolute to 15 psig / 1 bar, ranging up to 300-20,000 psig / 21-1379 bar.

LOADING – Spring, Dome, Air Actuated, Electronic

Loading refers to the method used to balance the outlet pressure. **Spring loading** is used with direct acting regulators with handknob adjustment. **Dome loading** is most often used in high flow, quick response type applications. **Air Actuator** provides outlet pressures up to 15,000 psig/1035 bar with a signal of only 100 psig/6.9 bar. A TESCO **electronic** controller is another loading option.

PANEL MOUNTING

Standard on some models. Extra option on others.

SENSING – Diaphragm or Piston

Diaphragms provide sensitive and accurate regulation for outlet pressure ranges up to 500 psig / 35 bar.

Piston sensors provide high strength integrity for high outlet pressures up to 20,000 psig / 1379 bar.

INLET PRESSURE RANGES

Sub-atmospheric to 20,000 psig/1379 bar.

PORTS

Sizes: 1/8" to 1"

Types: NPTF (all models), SAE, Aminco, MS33649, Slimline, BSP, welded fittings.

MAIN VALVES – Balanced and Unbalanced

Balanced design is used to reduce the effect of decaying inlet pressure and in certain models provides increased flow capacity. Unbalanced valve offers simplicity and economy.

ADDITIONAL CONSIDERATIONS

- Gauge ports, 1/8" or 1/4" NPTF
- Temperature range
- Corrosion resistance
- Welded connections
- Soft goods-Buna-N, PCTFE, Teflon®, Viton-A®, Vespel® and EPR.

SJS Series regulator)

Air Actuator
(26-2000 Series)

Cartridge Regulators
<ul style="list-style-type: none"> Cartridge style externally threaded regulators are designed to be easily installed in a manifold block Obvious benefits include: reduced piping, elimination of connections, reduced space requirement, ease of service Can be furnished in a wide variety of pressure reducing or back pressure styles Contact factory for application assistance
Differential/Tracking Regulators
<ul style="list-style-type: none"> Designed to provide a controlled pressure which is the sum of a signal (reference) pressure and a bias pressure (bias can be positive or negative) Applications include: automatic pressure compensation for mechanical (pump) seals, control of fugitive emissions, reduction of breathing gases in commercial or military diving
SJS Series Regulator
<ul style="list-style-type: none"> Maintains accurate differential pressure when incorporated into a double seal system Tracks upsets in system pressure and decreases downtime by increasing seal life
42 MW Welded Diaphragm Instrument Isolator
<ul style="list-style-type: none"> Isolates and protects the regulator from corrosive process media Intended for use with our wide range of tracking regulators Assists in the control of pressure in fugitive emission and/or mechanical seals applications
Air Actuators
<ul style="list-style-type: none"> Available for a wide range of pressure reducing and back pressure regulators Allows regulator to be remote actuated by an air signal from an external air source or by one of TESCO's electronic controllers Control pressures may vary from 20 to 20,000 psig / 1.4 to 1379 bar Ratios between actuator pressure and control pressure are available from 3:1 to 150:1 Compared to conventional spring loading, air actuation offers improved regulator performance

Integrated Custom Systems

Integrated custom systems simplify your pressure, flow & measurement applications. We provide standard designs and custom solutions from the component level and up – capabilities not found with other system integrators. From idea to implementation, whether simple or complex, TESCO has the expertise to deliver the final product that meets or exceeds your expectations.

ER3040 Series

ER3000 Kits

ER3000 Pressure Reducing and Backpressure kits are engineered to provide all the equipment needed to get your pressure control system up and running with minimum effort on your part.

- No guesswork - everything you need is included
- Easy to assemble
- Saves time, money & headaches
- Tuned and tested before dispatch

Kit I includes:

- ER3000SI
- Pressure reducing or backpressure regulator
- 4-20 mA feedback transducer
- ER supply regulator (optional)
- All connections and fittings
- ER junction box (optional)
- Documentation package

Kit II includes:

- Everything in Kit I above
- Components are pre-assembled onto a back plate or mounted within an enclosure

ER3000 Series Digital Pressure Controller

- Precise accuracy: $\pm .1\%$ FSO!
- Features controlled outlet pressure from 0-100 psig/0-6.9 bar as a stand alone unit
- Compatible pressure regulators available offering vacuum to 20,000 psig/1379 bar control
- Selectable setpoint signal source:
 - External analog, digital RS485, downloadable profile
- Selectable feedback signal source:
 - Internal 0-100 psig/0-6.9 bar sensor, external analog
- Selectable failsafe features
- NEMA 4X enclosure
- CE and CSA approved
- Two enhanced versions, ER3000FI and FV, offer additional analog/digital inputs allowing the user even more sophisticated control. These models also include analog sensor output.
- Free Windows® tuning and interface software provided
- RS485 convertors, power supplies and pre-wired models also available

ER3000E Series Explosion-Proof Control

- FM approved enclosure for Class 1, Division 1, Group B, C and D.
- Same features and benefits as ER3000

ER3040 Series

- Features of the ER3000 with OEM base, no cover
- Not available in Explosion-Proof

ER3000/26-2000 Series - High Accuracy, High Pressure Control

- Designed for applications where high accuracy and reliability are critical
- Choice of outlet pressure ranges to 20,000 psig/1379 bar
- Excellent for calibration systems

ER3020 Series - High Pressure, Low Flow Integrated Systems

- Integrates with 26-1000 Dual Piston Regulator to achieve 10-9000 psig/.69-620 bar in 395 milliseconds
- Choice of outlet pressure ranges to 10,000 psig/690 bar
- Gas or liquid applications
- Segregated venting
- Flow capacity: $C_v = 0.06$
- Other integrated regulators available

Electronic Pressure Controls

ER3110 Compact Integrated Unit

269-529 Low Pressure/High Flow Regulator

70-2000 Motorized Actuator

ER3100 Series - High Flow Control

- Integrates with 44-4000 venting regulator
- Choice of 500 or 900 psig/35 or 62 bar outlet ranges
- Flow capacity: $C_v = 0.7$ or 2.0
- Available in brass or stainless steel

ER3110 Series - Compact Integrated Unit

- Integrates with 44-5200 regulator, standard options available
- Features identical to the ER3000 (shown on page 11)
- Choice of outlet pressure ranges to 500 psig/35 bar
- Reference pressure: 100 psig/6.9 bar
- Flow capacity: $C_v = 0.06$ or 0.15
- Venting or non-venting

269-529 Series - Low Pressure/High Flow Pressure Regulator

- Maximum inlet pressure: 300 psig/20 bar
- Controlled outlet pressure to 100 psig/6.9 bar, some models up to 300 psig/20 bar
- Ports from 1/4" to 2-1/2"
- Flow capacity: C_v values up to 45
- Exceptional low pressure control throughout flow range

70-2000 Series Motorized Actuator

- 24 VDC motorized actuator provides remote adjustment of regulator setpoint
- Adaptable to 26-1000, 26-1600, 26-1700, 26-2300, 54-2000 and 54-2100 Series Regulators
- Variable speed control with adjustable limit stops to prevent over-travel

Pressure Transducers

- Ideal for use in ER3000 applications where an external feedback is required
- Provides extremely stable and repeatable hydraulic and pneumatic pressure measurements
- .1%, 0.25% and 0.5% accuracy available
- Choice of 4-20 mA, 0-10 VDC versions
- Wide choice of pressure ranges (including sub-atmospheric)

TESCOM Manufacturing & Distributor Network...

a worldwide presence!

NORTH AMERICA
Elk River, Minnesota USA

EUROPE
Selmsdorf, Germany

ASIA PACIFIC
Pudong Shanghai, China

TESCOM™ designs and manufactures a wide range of standard and custom engineered pressure control solutions for a diverse world market. Whether your needs are components like regulators and valves or pressure systems and assemblies, TESCO provides expert application and customer support from simple industrial applications to high tech complex projects. Market application know-how includes Aerospace & Defense, Alternative Fuels, Diving & Life Support, Laboratory & Research, Life Sciences, Medical, Oil & Gas and Microelectronics to name just a few. Close collaboration between worldwide design and manufacturing groups ensure the usage of state-of-the-art production technologies to provide the innovation and highest quality product that TESCO customers have come to expect.

TESCOM distributor support centers are located in most major cities worldwide. More than 100 locations provide application assistance and quality TESCO product.

TESCOM sales offices are located in California and New Jersey USA, United Kingdom, Germany, Singapore, South Korea and United Arab Emirates.

For a distributor or sales office location near you, visit **www.tescom.com** and click on the **Sales Locator** link.

Ultra-high purity pressure controls are available. These products are designed for semiconductor, flat panel displays, photovoltaic and other microelectronic applications.

**We are your worldwide partner
in precision pressure control.**
