

**New: Foam detection: Yes, we can do it!**

Foam is a problematic issue in many processes as brewing, pharmaceuticals, bioreactors, waste water treatment. Anti-foam products are added but often lead to chronic overdoses, since measurement of foam is difficult and doubtful.

Hycontrol developed a patented Intelligent Multi-Action technology, resulting in a high reliable instrument: **The SureSense Foam Detection**

**HYCONTROL**  
LEVEL MEASUREMENT SOLUTIONS

Variety of measuring probe configurations

Dense or sticky fouling do not influence measurement, thanks to the Intelligent **Multi-Action Technology**

**New: GASARC Laboratory Pressure Regulator**

- Superior accuracy
- Ergonomic compact design
- Fixed integral pressure gauge
- Encapsulated seat with “Anti Chatter design”

**New: GASARC Acetylene Gas Distribution System**

Improved safety features, protecting our end users from the potential hazards relating to “Acetylene Decomposition”
