

Model
DW-USB-LITE

Mini Temperature Data Logger

Single Channel, USB Interface

The **Model DW-USB-LITE Data Logger** is a low cost temperature data logger that measures and stores up to 4080 temperature readings over a measurement range 14 to 122°F. The stand-alone device has a fixed 30-min sample rate and a battery life of 1 month with continuous use. High/low alarm settings are user programmable through easy to install Windows® based software (included). The DW-USB-LITE features a visual LED alarm indicator. Stored data is downloaded by directly plugging the data logger into a PC's USB port and running the software, no cable required. Downloaded data can then be graphed, printed and exported to other applications.

Model DW-USB-LITE, Mini Temperature Data Logger

SPECIFICATIONS

Temperature Range: 14 to 122°F
(-10 to 50°C).

Temperature Accuracy: ±4.5°F
(±2.5°C).

Temperature Resolution: 2°F (1°C).

Memory Size: 4080 readings.

Sampling Mode: Continuous.

Sampling Rate: 30 min (fixed).

Computer Requirements: Windows® 98, Windows® 2000, Windows® XP, and Windows Vista® (software included).

Power Requirements: 3V coin cell battery (included).

Alarms: Programmable high/low.

Interface: USB.

Weight: 1 oz (30.0 g).

Agency Approvals: CE.
