

**New :** Special material tubes and tube bundles

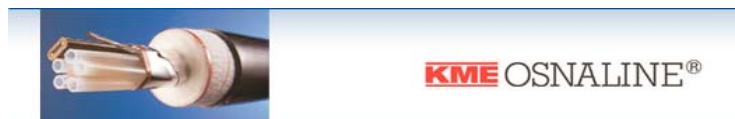

IPP recently supplied several coils of special tubing for high pressure Hydrogen (450 bar), with outer PVC Coating.

IPP can assist you to define tubing for your specific application.

**Sandvik has extensive lab facilities to help you find the most suitable alloy.** We offer not only coiled tubes, but also different types of tube bundles.

- Comprehensive range of corrosion-resistant stainless steels grades and nickel alloys
- Custom made alloys
- Plastic bundles
- Heated traced bundles
- Coils up to 1000 m
- State-of-the-art welding technology
- Conform to international standards

**Special made:** Electric driven high-pressure needle valve

**Picture**

In close cooperation with Parker, IPP engineered, build and tested an electrical drive for precise control of a high-pressure Parker Autoclave needle valve.

IPP is exclusive dealer and authorized installer for the Parker Autoclave high pressure ( up to 14.000 bar ! ) products.

**Exclusive:** Cryogenic Sampler

This new cryogenic sampler addresses issues in cryogenic sampling, especially for liquefied natural gas (LNG):

- All-in-one compact system
- Representative sample (no partial vaporization)
- Homogeneous sample thanks to in-line mixers
- No bubbles thanks to filter with de-bubbler action
- Easy maintenance with no moving parts
- ISO 8943 and EN12828 compliant
